

Georgia MathFest Competition

Largest Math Competition in the Country

Travels to Atlanta on December 14, 2019

Day Full of Math Fun and Competition for 1st-8th Graders

We Bring the FREE Excitement to Math

Our national nonprofit organization is committed to inspiring all students to become more engaged and successful with math.

For over 15 years, students have rotated in and out of our competition areas solving math problems using our gaming and fun platform. Our unique combination of math, motivation, and teaming has drawn tens of thousands of students across the country to our competition events. We are now seeking to involve more students by providing them an opportunity to attend a MathFest Event in their area. All 1st-8th Graders may participate at no cost and our broad advancement process will allow more students to advance to a Regional MathFest with support. For students to get better in math, they have to practice. To get sustained engagement, however, requires motivation. *We are the leaders in this country with motivational math.* Join us on December 14th at Morrow Middle School.
